## AIR PURIFIERS

Neo Tec Electron with technical assistance from Izumo Takahashi Co. Ltd., Japan continuously develop new products catering to modern life style. Neo Tec's technology overview enables you to know the filtering process. It is important that these features help to remove unnecessary dust, germs and other micro particles at all times in homes, offices and other indoor areas.

### AIR IONIZER

Removes allergens, bacteria, chemicals & other particles from the air

### HEPA AIR FILTER

99.97% effective at trapping particles such as dust & mold

### GERMICIDAL UV LIGHT

Destroys micro-organisms like germs, viruses, bacteria & mold

### ACTIVATED CARBON FILTER

Removes chemicals, gases, odors & cigarette smoke

### OZONE OPTION

Can be completely turned off, or activated to remove strong odors

### ANTI-BACTERIAL PRE-FILTER

Extends life of other filters by removing larger particles

## Intelligent and Multi-Function Air Purifier

### Multiple air intake vents

Multi-layer filters effectively trap and remove dusts, odors and smoke. Multiple-inlet design extends the coverage of purification and outputs a rich amount of negative ions and activates oxygen. Powerful fan motor rapidly circulates airflow at a rate of 3 metre cubic / min and shortens purification process to a large extent.

### Germicidal UV lamp

The built-in UV germicidal device can destroy microbes, viruses, bacteria and any other bio-pollutants efficiently. It also prevents proliferation of microbes that are collected on plasma collector or HEPA filter.

### Gigantic plasma dust collector

Super-sized plasma dust collector and HEPA filter along with a high production of negative ions and activated oxygen, powerfully remove dust, odors and smoke.

### Five operation modes for easy control

Soft touch buttons, five operation modes and an eight-hour timer for an easy control of purification speed. Indicators on the panel show the work status of each function, fairly easy to understand and operate.

Excellent dust collection  
rate up to  
**99.97%**

### Sensor monitors air quality

Incorporate smoke and dust sensor automatically monitor indoor air condition. When allergens are detected, the unit initiates a suitable purifying mode (low mode or medium mode) according to the amount of pollution. As more air is purifying, the sensor switches the unit back to low or silent mode accordingly.

## Ionic Closet Anti-Mold Cleaner

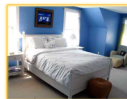

- Kills mold and clears away effluvia
- Keep closet interior clean and dry
- Advance ionic breeze technology
- Energy saving, only uses 1 watt
- Silent, no motor or fan
- Low voltage battery replacement indicator

"Preserve the quality for your apparel collection"

**BREATHE  
in cleaner AIR**  
every day • every month • every year

"Removes dust, odors and smokes  
lingering in all bedrooms"

"Effectively improve the  
air condition of  
your living room"

"Place advanced ionic breeze  
system and circulate clean  
environment in your vehicle!"

"If you know the basic importance  
of early financial saving,  
you should also apply the same  
concern for your health."
